

I endorse ARRL comments concerning Docket ET 03-104. Comments made by proponents of Broadband over Power Line (BPL) are not supported by significant scientific evidence to support approval of this docket. Continued research and development in BPL is needed to avoid the risk this new technology can cause to services licensed to operate in the 2MHz - 80MHz frequency range. Approval of ET 03-104 would violate existing FCC rules on non-interference and would not be in the best interest of the public.
